RE: Asbestos Management Plan for the Shelby County Public Schools
2022-2023 Academic School Year

DATE: July 1, 2022

This notice is sent to assure you that the Shelby County Public Schools is in compliance with both national and state regulations and laws relating to building materials which contain asbestos that have been used in building construction in past years.

An inspection for building materials which contain asbestos, has been completed for all school buildings owned, leased or otherwise occupied by Shelby County Public Schools. This inspection has been conducted by a certified inspector, and the material samples were evaluated by an accredited laboratory. Building materials containing as little as two percent (2%) asbestos or assumed positive have been identified and made a part of an Asbestos Management Plan for the school system.

A complete Asbestos Management Plan for the school district is available at the Principal's office during regular business hours.

We will continue to notify you at least once a year on the status of the Asbestos Management Plan. Should it be necessary, more frequent updates will be issued as a result of an additional inspection, normal surveillance practices, response actions or remodeling work, which might disturb building materials which contain asbestos. Every precaution will be utilized in order to protect the well-being of students and employees of Shelby County Public Schools.

Sally Sugg, Superintendent
